6e Technologies

6e Technologies is an Information Technology company providing software implementation and maintenance services to our Federal, Public Sector and Commercial clients. We pride ourselves as customer partners and help them during their digital modernization journey. Our client retention rate of 90% is a testimony of our deep partnership with our clients. Founded by group of technologists in 2003; our mission is to support our clients in their IT needs so that they can focus on their mission.

Benefits of working with us

Consistent with meeting or exceeding requirements ● Focused attention for every customer ● Communication ● Regulatory Compliance ● Easy Conflict Resolution ● Holding fiscal responsibility

Past Performance Examples

South Western Area Power Administration (SWAPA): Jan'19 - Aug'20: Oracle ERP Cloud Implementation: 6e Technologies led the requirement gathering and configuration for Oracle ERP Cloud modules AR, AP, GL, Procurement and Fixed Assets. The team helped through the process of ATU (Authority to Use) enabling SWAPA to change their back office operations to cloud subscription model.

Colorado Department of Labor and Employment (CDLE): Jan'19 - ongoing: Oracle E-Business Suite Managed Services: 6e Technologies is fully responsible for managing the functional aspects of CDLE's CLEAR system, which is all their back office applications. Since taking over this managed services program, we have been able to help CDLE with business process re-engineering and making the back office software more efficient.

RTD Denver: Mar'16 - ongoing: Last Mile Program: Modernizing Business Intelligence (BI) platform by consolidating on-premises BI tools and implementing best of breed Cloud technologies like Informatica, Power BI for continuous improvement while using Mobile Apps for the customer experience. Integrating with 3rd party ride providers like Lyft and Uber for Last Mile program.

Interior Business Center, Department of Interior (DOI): Mar'07 - Dec'18: Shared Services Program: 6e Technologies helped create the baseline for the Oracle E-Business Suite application for Interior Business Center (IBC) and create a shared services practice. The Oracle modules offered by IBC to their client base included AR, AP, GL, PO, FA, iProcurement, GRC. 18 clients were implemented through the period of performance.

MSHA, Department of Labor: July'18 - ongoing: Human Safety: 6e Technologies is responsible for implementing and maintaining Service Oriented Architecture (SOA) platform to collect and collate data from drones to gauge the safety of a mine before humans are allowed to enter.

• Clerical Support
• Records/File Services

Project Management
• Market Analysis
• Competitive Analysis
• Process Improvement
• Staff Development
• Quality Control
• Risk Mitigation
• Certified Program Management
Professionals

examples cont...

MSHA, Department of Labor: Human Safety: July'18 - ongoing: 6e Technologies is responsible for implementing and maintaining Service-Oriented Architecture (SOA) platform to collect and collate data from drones to gauge the safety of a mine before humans are allowed to enter.

Health and Human Services (HHS): Oct'18 - Nov'20: CGS supported with acquisition lifecycle subject matter expertise for the development of HHS acquisition tool called Accelerate that uses blockchain technology, machine learning and artificial intelligence (AI). CGS provided data analysis for integration of the PRISM environments with Accelerate, Assisted HHS in identifying and provide task order specific use cases and scenarios.

Interior Business Center, Department of Interior (DOI): Mar'07 - Dec'18: Shared Services Program: 6e Technologies helped create the baseline for the Oracle E-Business Suite application for Interior Business Center (IBC) and create a shared services practice. The Oracle modules offered by IBC to their client base included AR, AP, GL, PO, FA, iProcurement, GRC.
18 clients were implemented through the period of performance.

United States Department of Agriculture (USDA): Aug'16 - ongoing: CGS provides leasing oversight and compliance program support to the Director of Oversight and Compliance and the Realty Specialist, conducting lease audits, prepare weekly reports and document strategy. Assists in the development and production of quarterly and annual report tracking, data analysis and tracking compliance metrics, creation of data, documents and graphics for presentations. Creates adhoc reports in the Corporate Property Automated Information System (CPAIS), provides analysis and reports.

Department of Energy (DOE) Fossil Fuel: Feb'20 - ongoing: Provides Program Manager support over the administrative support for programmatic planning document preparation. Overseeing necessary data collection, entry, conversion, verification and purification for operation, maintenance, update and utilization of the FE management information systems. Updates and maintains FE Headquarters computing resources inventory database.

Department of Homeland Security: Dec'17 - Dec'19: CGS assisted USCIS with executing targeted Rapid Improvement Events (or "Kaizens"), taking no longer than 10 weeks each, to improve several key processes quickly with minimal impact to operations, and achieve a much faster return on investment for each improvement. Specifically, CGS facilitated project working group meetings and workshops using various quality and process improvement approaches, tools, and techniques. Provided training to project team members, project sponsors, project champions, and others as needed. Created project charters, milestones, timelines, and briefing materials, and documents all project activities needed to provide an accurate historical record of project activities.
