6e Technologies

We are a technology company that helps organizations implement Enterprise Resource Planning (ERP) & automate the processes to improve efficiency. We use Robotics Process Automation (RPA) and Intelligent Automation (IA) to help agencies save money and increase efficiency. We do end-to-end Program Management support, including requirements gathering, system design & implementation, documentation, testing, and training for our clients. We also design, build, and maintain dashboards for our clients for informed decision-making. We pride ourselves as customer partners and help them provide a unique competitive advantage during their digital modernization journey. Our client retention rate of 90%+ is a testimony to our deep partnership with our clients. Founded by a group of technologists, our mission is to support our clients in their IT needs so that they can focus on their mission. We enable resilient business applications in the fluid IT landscape by giving our clients the power to see beyond.

Benefits of working with us

- Always exceeding client expectations
- Client-Client and Client-6e industry best practices seminars
- Communication and transparency
- Always compliant with regulations such as NIST, FISMA by following best practices
- ISO 9001, 27001, 20000 certified and follow CMMI practices
- Fiscally responsible

Past Performance Examples

Centers for Medicare & Medicaid Services (CMS)

Eligibility Appeals Operations Support (EAOS): 6e Technologies provides specialized support to CMS for managing eligibility appeals process using Robotic Process Automation using Pega. We simplify Pega development through Agile Methodology and automate deployment and operational support for CMS.

Princeton Plasma Physics Laboratory (PPPL)

Oracle Training and Testing: 6e Technologies provides instructional design services for comprehensive training programs to PPPL. We train PPPL employees on Oracle Cloud and new business processes, using online and Train-the-Trainer sessions. We create testing strategies for Oracle Cloud implementations. We perform functionality, integration, regression, automation and UAT testing.

USDA Farm Production and Conservation (FPAC)

Data Analytics Support: 6e Technologies provides Data Management services including Data Architecture, Analysis and Design, Data Governance, Data Migration, Data Quality Management, Data Security Management, Data Warehousing, and Business Intelligence Management for USDA.

Marine Corps Community Services (MCCS)

Oracle Fusion Support BPA: 6e Technologies provide comprehensive support for Oracle Fusion, including integration maintenance, software functionality troubleshooting, and staff training.

Duke Energy

System Modernizing & Customer Connect: 6e Technologies consolidates existing legacy systems into an integrated customer engagement platform to deliver the universal experience customers expect from the latest technologies. We conduct requirements, analysis, design, and solution implementation using Agile methodology. We conduct UAT and training. We create dashboards for Duke Energy to keep track of customer engagement.

Regional Transit Denver (RTD)

Last Mile Program: 6e Technologies modernizes Business Intelligence (BI) using Robotic Process Automation and captures the improvement in dashboards. We integrate 3rd-party ride providers like Lyft and Uber for the Last Mile program and introduce Mobile Apps for a better customer experience
